An ABM Company

Be Recognized as a Manufacturing Industry Expert and Solution Provider

**MEP • MANUFACTURING
EXTENSION PARTNERSHIP**

Did you know Linc Service and TEGG contractors can join the [Manufacturing Extension Partnership \(MEP\)](#) to be recognized in their state and nationally as industry experts and manufacturing solution providers?

The MEP is a national network of specialists focused on the needs of small manufacturers, operated by the [National Institute of Standards and Technology](#).

Its national network consists of manufacturing extension partnership centers in all 50 states and Puerto Rico. MEP provides companies with services and access to public and private resources to enhance growth, improve productivity, reduce costs, and expand capacity.

Carpenter Electric, Inc., a TEGG franchise in Florida, is already taking advantage of this resource. Currently, Carpenter Electric is listed as the only provider of arc flash studies in Florida. The membership also allowed Marty Perrone, a MSR at Carpenter Electric, Inc., to be listed as an arc flash expert for [Florida Makes](#), a statewide, industry-led partnership that strengthens and measurably advances Florida's manufacturing economy.

Florida Makes is organization representing the MEP National Network and NIST MEP in Florida.

Each state's MEP Center works with their partners to develop a wide range of services to help manufactures grow and strengthen their business.

Contractors can join by reaching out to their state's MEP Center. For information on each state's MEP Center, view a listing [here](#).
