

# Top Ten Services to **HELP IMPROVE YOUR FACILITY**

## Looking for Solutions?

Here are a few services that we can provide to help reduce and control costs, while simultaneously improving your building's environment:

1. High efficiency HVAC filter replacements, additional filter changes

6. Validation of outside air damper settings and/or controls to avoid mold growth

2. Installation of HEPA filters to improve indoor air quality (IAQ)

7. Validation of correct air balance in buildings via NEBB or AABC certified test and balance contractors

3. Infrared scanning of equipment to check operation and detect high temperatures

8. Evaporator coil cleanings

4. UV Lights in ductwork; UV portable units for healthcare locations and data centers

9. Dry duct cleaning

5. Global Plasma Solutions (GPS) that improve indoor air quality

10. Building controls validation to ensure systems are operating properly
