

## Lippolis Electric, Inc., Volunteers at Blythedale Children's Hospital

Several Lippolis Electric, Inc. employees spent time with children and their parents at Blythedale Children's Hospital in Valhalla, NY, on May 28.

Carmine Lippolis, CEO of Lippolis Electric, Inc. in Pelham, NY, partnered with Blythedale Children's Hospital soon after he became President of the Westchester County Licensed Electrical Contractors Association in 2015.

Blythedale is the only independent specialty children's hospital in New York State that provides the highest level of multi-disciplinary medical care and rehabilitative needs for children with complex medical illnesses and long-term medical conditions.

After his first tour of the hospital and seeing the children, he began devoting his time and energy with the Association to raise money for the kids. He wanted to make sure that the money raised would provide these children with the chance to have every opportunity to dream and reach for the stars.

Shortly after he became involved, Carmine was named Golf Chair of The BNC Insurance Golf Classic for Blythedale. As Chair for over 10 years, Carmine has used his resources within the business community to raise money to support the hospital in continuing its research and care of the children and their families.

On May 29, Carmine wanted to share his vision with his staff and took several employees to the hospital for a day of volunteering. He was very gratified to see how excited his team was to spend the day engaged in community service.

Lippolis Electric, Inc., conducted its monthly live podcast, aired by WestchesterTalkRadio, at the hospital. Carmine elaborated on his commitment to raise money for the various medical and rehabilitative needs of the children and for The Parent Amenity Fund. This fund helps families who would not otherwise be able to afford food, clothing, housing, and transportation while their child is in the hospital. Every element of the hospital is for the children, but the parents are an essential part of their health and rehabilitation.
