

## TEGGPro Remote 2 Update Now Available

# TEGGPro™

An update to TEGGPro Remote 2 will be available on Monday, November 25.

TEGGPro Remote 2 users will need to upgrade their systems to take advantage of the improved features, including:

- Dashboard Testing status (equipment tasked/tasking completed)
- Show equipment not scheduled refresh issue
- Access to FLIR and Reports improved
- Backup database notification

Please follow these steps to take advantage of the updated TEGGPro Remote 2:

1. Start your TEGG Sync application, which will automatically upgrade, then follow the prompts:
  - a. When asked to make configuration changes to your system, please select "OK."
  - b. Next, you will be prompted to wait for the TEGG Sync application to re-open. Please select "OK."
  - c. Once your TEGG Sync application opens, the update and configuration changes are complete.
2. Run a Software Update from the TEGG Sync application to take advantage of the updated TEGGPro Remote 2.
