

## Nilsen (VIC) Pty Ltd. Hosts Arc Flash Safety Training for New Client

Nilsen Pty Ltd. hosted an Arc Flash Safety Training session for a new client to assure they are educated and safe when working near their facilities' electrical equipment.

The training session provided the client with information on electrical safety hazards, Arc Flash Risk Assessment, Personal Protective Equipment and NFPA 70E and 70B standards.

The training session was led by Joe Gierlach, ABM Franchising Group's Vice President of Technical Training and Support, at the client's facility.

"An arc flash incident can happen in an instant, so it's important to make sure that not only employees, but also clients, are educated about taking the proper precautions," Gierlach said. "I applaud Nilsen Pty Ltd. for proactively providing their new client with this seminar to make sure they are educated and know how to be safe."

Scott Seddon, Division Manager at Nilson (VIC) Pty Ltd., said he was proud of his team for organizing the training session. The session added value to the client's agreement.

"The client got a sense of the passion we have for TEGG and providing preventive maintenance," Seddon said. "The early feedback is really positive."
